ESTABLISHED 1866

PAEONIA EDULIS SUPERBA

3 Wonderful Paeonias for \$2.00

They Really are Wonders Plant this Fall—Gorgeous Blooms Next Spring

EDULIS SUPERBA (Pink)—Bright mauve-pink, large, loose, flat crown; quite fragrant; early, blooming about Decoration Day. We regard Edulis Superba as one of the finest pink variety in our collection comprising over forty varieties.

FESTIVA MAXIMA (White)—The best and most popular white flowered paeonia. Very large, globular, rose type. Pure white center, prominently flecked crimson; outer petals sometimes faint lilac white on first opening. Very tall, strong, vigorous grower. Early.

FELIX CROUSSE (Red)—Brilliant red—absolutely nothing finer in red paeonias. Large globular, typical bomb. Fragrant, strong grower, freebloomer. Here is a paeonia you will be proud to possess.

Never during our more than half a century's experience as growers of choice paeonias have we offered a collection for \$2.00 that possessed the merit and charm that these do. Order at once—stock is limited.

Plant Super Size Fruit Trees

4 Years Old—7 to 9 Feet in height

Plant this Fall

You are gaining time when you plant such trees as these—Time is money. A number of these trees, particularly some of the pear and plum produced fruit in the nursery this season. Plant some of these trees and you will suffer no regrets—they are real choice.

For those of our customers who prefer trees of a larger size than are usually sold by nurserymen, we have grown a few of these handsome specimens. Such trees naturally will produce quicker results, but their cost is slightly more than the smaller two-year trees described with prices on pages 5, 6, and 7 of our general catalog. **THESE LARGER TREES ARE WELL BRANCHED, WELL ROOTED, AND WELL BALANCED.** It takes work, time and money to produce such trees and we have spared neither. We have done the long waiting for you.

Each tree has been grown, cultivated and pruned for a specimen. All of them grade from seven to nine feet in height. The illustration at the side shows a specimen plum. If you want larger fruit trees, something real choice and fancy for quicker results, order before our stock is exhausted.

No Finer Trees Grown Than "Glenwood Grown"

PLANT FANCY TREES FOR FANCY FRUIT

In our own experience the best success has resulted in transplanting trees and shrubs in the Fall, in properly prepared soil, and giving Winter protection by mulching with litter or leaves. Such subjects usually start promptly in the Spring, and have already made a fine growth before Spring planted trees have started. **PLANT THIS FALL**

This Wonderful Everbearing Raspberry

Bound to be Planted in Every American Garden—Plant Yours this Fall—Pick the Berries Next Summer.

From June until late fall ERSKINE PARK EVERBEARING RED RASPBERRY will produce an abundance of large red, luscious berries and bear continually throughout the season. Do not confuse ERSKINE PARK with any other "so called" everbearing raspberry. Erskine Park is in a class by itself.

Conceive the joy and satisfaction of having such berries on your table all through the summer and autumn, the source of wonder to your neighbors, that you can pick the finest raspberries until the snow flies. On November the 20th, we cut a large branch of the Erskine Park with blossoms, green berries and ripe fruit upon it.

PRICES—Strong 2 yr. bearing transplants, per 6, \$3.00; per 12, \$5.00; per 100, \$30.00.

Messrs. Glen Brothers, Inc.
Rochester, N. Y.
Gentlemen:-

St. Paul, Minn. June 2, 1921

It may be of some interest to you to know that the Erskine Park raspberry plants ordered from you in April 1920 withstood one of the worst winters we have had for years. We had very little snow, and an alternating freezing and thawing February and March, and many of our local shrubs succumbed. At present time, there is an elegant display of young plants shooting up.

I planted these in sandy loam, and on the opposite side of a dead furrow I planted at the same time two of (names a much advertised everbearing raspberry) which showed equal development through the summer and fall, but this spring everything is dead, not a live root to be found.

Yours truly,
(Signed) Thos. E. Covington.

Trees like these are sure to please—for get the first cost.

Dwarf Apple and Pear Trees

We are headquarters for this class of trees.

Fruit Trees suitable for the smallest garden as well as for the largest.

Six choice varieties, three of apple, and three of pear—just enough for a small yard and enough variety for everyone in the family. Dwarf trees are distinctly for the amateur and the home plantation. They enable you to have varieties which cannot be found commercially, and to secure an assortment which will give fruit in succession for twelve months of the year.

The varieties that we have selected for this collection are unsurpassed; some of them will bear large luscious fruit the first season, if planted this Fall.

- | | | |
|------------------------|-----------------------|---------------------|
| 1 Red Astrachan Apple, | Season for table use, | August. |
| 1 Wealthy Apple, | " " " | October, November. |
| 1 Winesap Apple, | " " " | January to June. |
| 1 Koonce Pear, | " " " | July. |
| 1 Bartlett Pear, | " " " | September. |
| 1 Anjou Pear, | " " " | October to January. |

The trees for this collection are carefully selected. It is our aim to supply only trees that are thrifty, well branched and rooted, and we have made the price within the reach of all.

OUR PRICE IS ONLY \$5.00 FOR THIS COLLECTION
—This is a great investment.

Blueberry pie is the pie of big mouthfuls, crushed lusciously.

Delicious Blueberries

BLUEBERRY PLANTS FOR YOUR OWN GARDEN

Can you imagine picking delicious Blueberries from your own plants, in your own garden? But it is true nevertheless, and today thousands of people, some in your own locality, no doubt, are doing just this—if you are fond of Blueberries with sugar and cream, blueberry pie or preserved blueberries—plant some of our strong, well-rooted plants this Fall. Nothing quite so delicious—one never tires of them. One dozen plants are sufficient for the average family—six plants if your family is small.

PRICE FINE PLANTS, 2 to 3 feet in height, branched \$2.00 each, \$20.00 per dozen.

Second to Blueberry pie, Rhubarb, the pie of heart's desire.

Burbank Giant Crimson Rhubarb

A LUTHER BURBANK CREATION.

Extra large, of fine bloom, and crimson clear through, this new variety of appetizing "pie-plant" should be in every garden, and will be when known. Plant a few this fall along beside that you now have growing in your garden and note the difference. BURBANK GIANT CRIMSON is superior in size and quality to any variety we have ever tested. It is an early variety, without being in the least tough or stringy, with a mild sub-acid flavor. Largest and best of all for market or home use.

Plant this Fall in good garden soil, manure well, and have delicious pie and sauce early next summer.

PRICE FOR STRONG ROOTS, 1 YEAR OLD, 50c each. \$3.00 per dozen.

Stock planted in the Fall gets the benefit of the late Fall and early Spring rains, which is of vital importance; on the contrary stock set in the Spring frequently has to worry through a dry Summer, which it is utterly unprepared to do after having been so newly transplanted. The result is that its growth is stunted. **PLANT THIS FALL.**

Our New Rochester Peach

Planted in Fall—Frequently Fruits Following August

It is proven fact that our new Rochester Peach is the earliest yellow freestone, producing fruit in this section the middle of August. It is unquestionably one of the most desirable peaches yet discovered. The tree is a strong upright grower of iron clad hardness. It has stood 16 degrees below zero and produced a full crop, while Elberta and Crawford under the same conditions in the same orchard produced no blossoms, consequently no fruit.

PICKS FRUIT FIVE MONTHS AFTER PLANTING

Mr. C. N. Thomas, 215 W. 40th St., Savannah, Ga., writes us under date of July 23rd., as follows:- "February of this year, I bought a Rochester Peach Tree from you. On July 20th, same year, I picked one of the finest peaches I have ever tasted. The stone was very small and clean. The meat was a light yellow, perfectly ripe all the way through. Can you beat this?"

WE OFFER SPLENDID, WELL DEVELOPED TREES, WITH PLENTY OF ROOT POWER, \$1.00 EACH; \$10.00 PER DOZEN; \$75.00 PER HUNDRED. EXTRA SIZE TREES, \$1.50 EACH, \$15.00 PER DOZEN.

On April 10th, 1916, I set out one of your new Rochester Peach Trees. Last year we picked 5 peaches from it, each averaging the size of an average teacup. **THIS YEAR WE HAVE PICKED EXACTLY 403 LARGE PEACHES FROM THIS ONE TREE.** Many people have seen this tree and can hardly believe their own eyes. One of its admirers was Postmaster J. E. Sullivan, who wants me to put him in touch with the fellows who have such trees for sale.

C. E. Strawbridge.

"Rochester Grown" Filbert Trees

Gather a few of these in the Fall, you will enjoy them during the winter.

PLANT A FEW FILBERTS ABOUT YOUR GROUNDS

It is perfectly hardy all through the north, withstanding at our nurseries 15 degrees below zero without winter killing, or injuring the crop, so that iron-clad hardiness, rapidity of growth, earliness of bearing, and great adaptability, are the four splendid qualities which means a large and extensive planting all through the east. Planting should be at a distance of twelve to fifteen feet, and moderately rich, well-drained soil is required.

KENTISH COB. (English)—nuts large, oblong, somewhat compressed, kernel plump and of rich flavor; an excellent keeper. Husk smooth, longer than nut and but slightly cut in margin. Tree productive.
2-3 ft., 75c each, \$7.50 per dozen, \$60. per 100
3-4 ft., \$1.00 each, 10.00 per dozen, \$75. per 100

PURPLE LEAVED. Nut large, thin-shelled, delicious quality. The leaves and husk are of a deep purple color.
1½-2 ft., \$1.25 each, \$12.00 per doz.

HAZELNUT. (American Filbert) Bears excellent nuts and in great quantities; also very ornamental.
2-3 ft., \$.75 each, \$ 7.50 per doz. \$50. per 100
3-4 ft., 1.00 each, 10.00 per doz. 75. per 100

BLACK WALNUT—There is a richness in the flavor of the Black Walnut Kernel that is peculiar to this nut.

"Rochester Grown" Black Walnuts

NUTS RICH AND DELICIOUS

Absolutely hardy, growing and bearing under adverse conditions, the American Black Walnut surpasses all other varieties of nuts in point of hardiness. From Canada to the Gulf of Mexico, the Black Walnut will thrive, and after the first few years requires little attention, making a rapid, sturdy growth and soon producing an addition to the owner's income without operating expense.

For roadside planting or for reforesting large areas, we have extensive plantings of these valuable trees to offer at the following attractive prices:

3-4 ft., 75c each, \$8.00 per doz., \$60. per 100
6-8 ft., \$1.25 each, \$12.00 per doz., \$90. per 100
Extra large trees, 8-10 ft., \$3.00 each, \$30.00 per dozen, \$200.00 per hundred.

BUTTERNUTS—We have never seen the person who is not fond of them.

"Rochester Grown" Butternut Trees

One of our finest native nut trees, growing occasionally to a height of 100 feet and spreading in proportion. The wood is much valued because of the beautiful finish possible in cabinet-work. The large, elongated nuts are rich, sweet and of delicate flavor; very nutritious.

The size of the nuts can be increased by cultivation. As the present supply of cultivated Butternuts is insufficient to satisfy the demand of a single city market, there are large profits in store for planters who will exert themselves to supply this demand. The trees bear when young, and after they come into full bearing will bring large returns on the original investment.

Price, 5 to 7 ft., \$1.00; \$9.00 per doz.

These nuts were picked from a 4-year old tree.

"Rochester Grown" Japan Walnuts

A tree that is of particular interest to northern planters because of its hardiness, withstanding temperatures of 20 to 30 degrees below zero without injury. Comes into bearing at an early age—usually in three or four years. The meats are large, very sweet, easily removed, for the shell is very thin and parts easily at the sutures, enabling one to get the kernel out whole. Extensively used by confectioners, and as a dessert nut has few superiors. We recommend it as one of the best of the Japanese varieties. Owing to our immense stock on hand, we are able to offer extra fine trees to fall planters at following prices:

3-4 ft., \$1.00 each, \$10.00 per doz. \$75. per 100
4-5 ft., \$1.25 each, \$12.00 per dozen. \$80. per 100
6-7 ft., \$2.00 each, \$20.00 per doz.

Before Spring, stock which has been planted in the Fall gets well established in its new position and so gets an early start, and makes a large growth during the season, while STOCK PLANTED IN THE SPRING LOSES CONSIDERABLE VALUABLE TIME IN GETTING ESTABLISHED IN ITS NEW QUARTERS.

Rochester Grown English Walnut Trees

Start an English Walnut orchard this Fall. Make a beginning and add to it each season. Start with rugged, acclimated trees, grown under severe climatic conditions, with temperature far below zero at times.

For lawn or driveway, English Walnut is exquisitely beautiful with its smooth light gray bark, luxuriant dark green foliage, lofty, symmetrical growth. A homelike tree to plant about the home. Rochester parks and public streets contain many beautiful bearing trees, apparently as hardy as the Maples and Elms. At least, thriving under the same conditions, and producing annually delicious nuts as well as shade. Truly a most delightful combination.

Fairport. Grown from nuts from parent trees which came into bearing at four years of age. An excellent variety, 2-3 ft., \$1. each, \$10. per doz., \$75. per 100; 3-4 ft., \$1.50 each, \$15. per doz., \$125. per 100; special specimen trees, 5-6 ft., \$5. each, \$50. per doz.

Thomson. Grown from nuts produced by the Thomson orchard. 2-3 ft., \$1. each, \$10. per doz., \$75. per 100; 3-4 ft., \$1.50 each, \$15. per doz., \$125. per 100; special specimen trees, 5-6 ft., \$5. each, \$50. per doz.

EXTRA-LARGE ENGLISH WALNUT TREES. Superb for lawns and driveways. For those of our customers who wish to get the earliest possible results, both in bearing, age, and appearance, we offer, this coming Fall a few specimen trees; will prove exceptional values. 6-8 ft., \$10. each, \$100. per doz.

Seattle, Oct. 20, 1920

You will be interested to know that at the Western Washington Fair just held at Puyallup, my exhibit of English Walnuts secured first prize.

Without minimizing the value of our method of treatment and our excellent soil, it is obvious that had we not started with clean, pure type stock, such as that secured from you, we could never have been so successful. David Whitcomb.

Old Glory Grape Set

Red, White, Blue—These 3 for \$1.50

Delicious fruit the 2nd or 3rd year after planting, and plenty of it, if you plant these three choice varieties this fall.

Respect for our country's flag would not permit us to give this name to any collection that was not made up of the CHOICEST AND BEST VARIETIES. They are as follows:

CATAWBA (Red)—Bunch medium, somewhat loose; berry medium to large, round; a rich shade of red; very handsome and attractive; flesh tender, sweet, and with a rich aromatic flavor; ripens soon after the Delaware, vigorous and productive. We regard it as one of the best red grapes.

NIAGARA (White)—Bunch medium to large, compact, occasionally shouldered; berry large, roundish, uniform; skin thin but tough, pale green, changing to pale yellow, with a thin whitish bloom; flesh slightly pulpy, tender, sweet. Remarkably vigorous, healthy and productive; foliage thick and leathery. Ripens with the Concord. All things considered, probably the most valuable white grape in cultivation.

CONCORD (Blue)—Clusters large and handsome; berries large, nearly round with handsome blue bloom. Flesh rather firm but tender; quality rich, sweet slightly vinous; a strong and vigorous grower with healthy foliage. The berries do not drop early from the cluster and the fruit keeps a long time in perfection.

Any posted man will confirm our statement that these three are unrivalled. They combine STRONG, QUICK GROWTH, HARDINESS, PRODUCTIVENESS AND QUALITY, and the price is so low that all can afford to have them. They require but little room—"any old fence will do"—and but little care, and BEAR YOUNG.

Plant a grape vine wherever you can find a space 6 inches square.

Beautiful Cut-Leaf Weeping Birch

In extra large size, 10-12 feet—only a limited number of these handsome specimens

These trees have received the care and attention to make them very symmetrical and each tree is a perfect specimen.

Cut-Leaf Weeping Birch is one of the most elegant of all weeping or pendulous trees. Its tall, slender, vigorous growth, graceful drooping habit, silvery white bark and delicately cut foliage presents a combination of attractive characteristics rarely met with in a single tree. It is very popular planted as a single tree, or in groups of three or four trees, the white bark of branches and twigs gleaming conspicuously among the darker greens and browns.

While they last, we offer these extra size trees at \$5.00 each, \$50.00 per dozen.

The Queen of Lawn Trees

Delicious, Juicy Plums, 2½ x 2 inches in size

The World's Best Purple Plum Grand Duke

In Grand Duke we offer a variety that comes into bearing early; a variety that will produce fruit the second or third year. Extremely delicious, either as raw fruit, or a preserve, and we regard it as the best of all varieties of purple plums.

"The Plums of New York" by V. B. Hedrick, describe it as follows: "Fruit large, cavity shallow, color dark reddish purple, or purplish black, overspread with thick bloom; stems three-fourths inch long, adhering well to the fruit; flesh golden yellow, firm, sweet, mild, stones cling, sometimes tinged red."

Could anything be more desirable than to have one of these trees in your garden loaded with delicious fruit?

For those who desire something really fancy and exceptionally heavy and regular cropper, **Grand Duke** fills the bill.

We offer a limited quantity of this variety in splendid 2-year trees at \$2.00 each, \$20.00 per dozen; 4-year-old trees, 7-9 ft. in height, \$3.00 each, \$30.00 per dozen.

Stock is completely dormant in the Fall, and therefore can be easily and safely handled, while in the Spring the weather often comes off warm so early as to start the buds seriously before the customer can receive and plant the stock.

“Honeysweet” Black Raspberry

Sweet as Honey—The Berry for the Million and the Millionaire — There’s Millions in it—The Sensation of the Fruit World.

The most delicious fruit you ever tasted. Ripens in July—sweet and delicious—unlike any other black raspberry. “Honeysweet” is extremely hardy, passing through the severe fruit-tree-killing winter weather of 1919-1920, without injury to a single twig on any plant in a four-acre patch. Bears every year—has never been a slacker. Large size, glossy black, delicious—the world’s greatest BLACK-CAP.

Many clusters of big Black Raspberries literally cover the bushes. Twelve of our vigorous, nursery-grown plants will produce many quarts of fruit next summer when you are hungry for berries. Twelve or more plants will fit into your garden nicely. No garden should be without “Honeysweet.” As a dessert berry, in pies, as a canned sauce, as a jam, you never tasted anything like it before or since—*truly a fruit fit for a king.* It has been called “The most delicious Black Raspberry.”

PRICES—Per six, \$2.50; per twelve, \$4.00; per fifty, \$15.00; per hundred, \$25.00; per thousand, \$200.00

Received both my orders from you in fine shape. You say that you like to please people, I am certainly pleased with your way of packing for shipment. Hope to send for another order next fall. Thank you for catalog and instruction book.

1347 East Lawn St., Detroit, Mich., 4-25-21

M. L. Burgess.

Apart from the health-giving quality of the pines about your home, they have a charm of color and form hardly equalled by any other evergreen.

Kept trimmed it presents a snappy setting for any home no matter how modest or costly.

Banks of Snow During Early Summer

FRUIT IS PRODUCED THE FIRST SUMMER when Grape Vines, Currants, Raspberries, Blackberries, Gooseberries, etc., are planted in the Fall.

The Pines

They Just Permeate the Atmosphere with their Spicy, Resinous Odor So Exhilarating and Healthful.

AUSTRIAN PINE. Height, 60 to 150 feet; a robust grower, with leaves in pairs, about 4 inches long, rigid, very dark green; cones 2 to 3 inches long, of a yellowish brown color. Wonderfully adaptable to conditions and does especially well at the seashore. There is a quarantine against the White Pine and we suggest that our customers plant the Austrian Pine instead.

2-3 ft., \$2.50 each; 3-4 ft., \$3.50 each; 4-5 ft., \$5.00 each; 5-6 ft., \$6.00 each.

SCOTCH PINE. A tall-growing, broadly pyramidal tree with strong, erect shoots and bluish green needles; cones grayish or reddish brown, 1½ to 2½ inches long. Quite hardy, and one of the most important timber trees of Europe. Makes a good growth, even when planted in very poor soils.

2-3 ft., \$2.50 each; 3-4 ft., \$3.50 each; 4-5 ft., \$5.00 each; 5-6 ft., \$6.00 each.

MUGHO PINE. (Dwarf). A handsome, low spreading shrub, with ascending branches and short bright green leaves in pairs; cones 1 to 2 inches long, grayish brown.

15 x 15 in., \$3.00 each; 2 x 2 ft., \$5.00 each.

Let us suggest a hedge of Barberry Thunbergii

(JAPANESE BARBERRY)

Remarkable for its dense spreading growth, its hardiness and attractive appearance throughout the year. One of the earliest to start in the spring; before most other plants have awakened from their sleep it is covered with the greenness of its dainty little leaves and a few weeks later with myriads of small pale yellow flowers, followed by an abundant crop of fruit, ripening into scarlet berries which remain to make the bush a conspicuous and attractive object all winter. The brilliant autumn coloring of the leaves which assume the brightest shades of orange, scarlet, and crimson, is not the least of the attractions of this interesting bush. By trimming it can be kept of any size or shape desired, 1½ to 2 ft., 60 cts. each, \$5.00 per doz., \$40. per 100; 2-3 ft., 75 cts. each, \$8.00 per doz., \$60. per 100.

The Graceful Drooping Spirea

Hardy—BRIDAL WREATH—Showy

This is one of the finest deciduous shrubs for planting about the foundations of buildings that we know of. In the early spring, the long, sweeping branches of this splendid variety are literally covered over much of their length by the small, charming double white flowers. The leaves in autumn assume brilliant tints of orange and scarlet.

This well known and popular shrub is a great favorite at "Glenwood" and attracts a great deal of favorable comment from visitors at the nurseries. We recommend it as a shrub that will give more real pleasure and satisfaction for what it costs than anything we grow.

We offer strong extra large plants which are grown expressly to produce immediate effect at 75c each; \$7.00 per dozen.

Big Juicy IVES Grapes for Delicious Grape Juice

*Nothing Quite so Sure to Grow, Nothing Quite so Sure to Bear,
Nothing Quite so Sure to Please Every Taste.*

EXTRA-HEAVY VINES—BIG FELLOWS—SPECIAL.

We receive many letters each season from customers who desire to plant an extra good grape and who want to buy plants of a larger size than those usually offered. To supply the demand we have selected the IVES as the best black grape we know of and offer this Fall a limited quantity of extra size plants 3 to 4 years old. These plants will naturally produce fruit quicker and to those of our customers who want something real choice and fancy, we recommend these plants.

IVES was originated by Henry Ives of Cincinnati, Ohio, probably from the seed of Hartford. Its color is black;

BUNCH extremely large, shouldered, compact, handsome BERRY, large, tender, juicy, sprightly, vinous, rich, sweet without pulp. Esteemed as the best grape for making red wine. VINE is vigorous, healthy, hardy. In addition to all this, it is a very reliable variety and usually free from mildew or rot.

If you want a delicious Grape, plant Ives. If you want quick results, PLANT THESE EXTRA SIZE VINES.

PRICE—\$2.00 each; three for \$5.00; six for \$9.00 twelve for \$15.00.

It is difficult to conceive anything more pleasing to the eye than a bed of tulips.

Sunset Bulb Collection

12 Dazzling Tulips
6 Fragrant Hyacinths
12 Darling Crocus } All for \$1.50

Plant in the Fall—Blossoms in the Spring.

These gay flowers spring up to the light almost before the grass is green, delighting the eye and charming the senses with their bright-hued cups of many colors. You cannot plant too many—a good place is any place—in groups, in figures, in lines at the edge of the walks, etc.

There is no class of bulbs that makes so rich and gorgeous display of blossoms with so little attention and care in cultivation, and at so trifling a cost.

Blue Ribbon Lilac Collection

Supremely lovely the lilacs.

12 Choice Plants, \$7.50

Lilacs, the theme of song and story, bring the atmosphere of the "Old Homestead" to your estate.

Over wide areas their delicate scent perfumes the air, and their profuse, graceful blossoms, with gorgeous changing tints, are matchless for floral decorative effect.

All our varieties thrive in any fertile soil and can be used singly, massed or in groups to produce the effect desired.

We are offering this season for special selection, twelve vigorous plants (six different varieties, choicest in cultivation) in all colors, early and late flowering. Everyone will want one of these charming collections for planting about the home, which will add beauty and fragrance in the spring as no other flowering shrubs will. PLANT THEM THIS FALL, they will bloom in the Spring.

Contribute brightness and perfume to the shrubbery of which they are a part.

A grand free-flowering vine with handsome, showy flowers

What is more enhancing than

The Wisteria

Showy and desirable—Blossom 12 to 15 inches long.

Purple Wisteria. Picturesque climber with great clusters of pale, bluish violet, pea-shaped flowers that make a handsome showing when a vine has been properly trained over a porch or arbor. After becoming established, the vine makes an enormous annual growth. Extra Heavy Plants \$1.00 each. \$10.00 per doz.

White Wisteria. The vine has all the sterling qualities of its parent, the preceding variety, being different in that magnificent clusters of flowers are white. Extra heavy plants \$1.00 each. \$10.00 per doz.

Tree-form Wisteria. It is possible to train the Wisteria as a standard, and we have specimens growing on our grounds that have always been the center of attraction when in bloom. We have a number of such Tree-Form Wisteria in two colors—White and Purple—that will be most desirable for lawns. Either color, \$3.00 each.

Stock delivered in the Fall arrives in better order, because Nurserymen have more time to handle it; but in the Spring it comes off warm so suddenly that it is time to plant before the stock can possibly be dug, packed and delivered to all the thousands of customers scattered over the country.

JULIET—Old Gold and Rosy Red

Exquisite—a Perfect Beauty—Fragrant

We describe it from observation as follows: **Buds coral red, shaded with yellow at the base.** The open FLOWERS ARE LARGE SIZE, VERY DOUBLE, and are of SUPERB CORAL-RED, shaded with the most beautiful sulphur-yellow about one-half the length of each petal. It blooms in great profusion, the flowers are of exquisite form and substance. JULIET has become instantly popular and we extend a cordial invitation to those visiting Rochester during the summer season to visit our nurseries at Fairport and see for themselves this magnificent rose in bloom. PRICE for extra strong 2-year blooming plants, \$2.00 each, \$10.00 per 6. Number of plants to each customer limited to 6.

Bekley, W. Va., Box 117, June 20, 1921.

I want two, 2 year old Juliet Roses. I got one this spring and it is a beautiful thing just been in about 7 weeks, and full of buds. If you think it is too late to put them in now, hold my order and send them when you think best to plant them. Send parcel post C.O.D. and oblige.

Mrs. C. A. Davis.

Ornamental Shade Trees

Desirable for street, lawn, and boulevard planting.

COMES NOVEMBER, the ideal time to transplant large trees, because they are perfectly dormant; the ground is warm and mellow, promoting quick root growth. **Autumn planting** conditions reduce the risk of transplanting to a minimum.

WE HAVE A LIMITED NUMBER of the following varieties and sizes which we especially recommend, and which will give permanency and dignity, the aim to be sought in all planting:

Specimen Trees—Immediate Effect

	Height ft.	Caliper in.	Price each	Per 100
American Elm	12-14	1 3/4 - 2	\$3.50	\$240
Maple, Ash-leaf	12-14	1 3/4 - 2	4.00	280
Maple, Norway	12-14	1 3/4 - 2	3.50	225
Maple, Silver-leaf	12-14	1 1/2 - 1 3/4	2.00	180
Catalpa Speciosa	12-14	1 1/2 - 2	2.00	120
Linden, American	12-14	2 - 2 1/2	4.50	325
Ash, White	12-14	2 - 2 1/2	3.50	220
Oak, Red	12-14	2 1/4 - 2 1/2	6.00	360
Oak, Pin	12-14	2 - 2 1/4	5.50	320
Plane, Oriental	12-14	1 3/4 - 2	2.50	150
Tulip Tree	12-14	1 3/4 - 2	3.00	135
Birch, European White	12-14	1 3/4 - 2	3.50	300
Birch, Canoe	12-14	2 - 2 1/4	3.00	260

I think that I shall never see a poem lovely as a tree.
—Joyce Kilmer.

Willows for Brookside Planting

And Everywhere Near Water

Varieties: Babylonica, Wisconsin, Crimson, Golden.

For quick effect and early maturity they are exceptionally satisfactory. We include in our offering the Crimson and Golden Barked varieties which are immensely attractive in Winter, when their brilliant branches are bare of leaves. The Willows are also used largely to prevent erosion of slopes, steep banks, and alongstreams.

OPPORTUNITY

We offer the following varieties, 12-14 in height, at \$3.50 each; \$300 per 100.

Many extensive and experienced planters, like the late horticultural writer, E. P. Roe., ALWAYS PREFER TO PLANT IN THE FALL.

Few trees give in Autumn the rich effect of the Mt. Ash with its branches laden with beautiful scarlet fruit.

Giant Argentiul Asparagus

We offer for Fall Planting Extra Heavy 4-year old Crowns Transplanted

LUSCIOUS ASPARAGUS THE FIRST SEASON

Two years saved by planting four year transplanted roots this FALL. Down to no doubt the highest authority says: "Roots of this age will produce the same season planted." A great many more people would grow their own asparagus if it were not for the two years of waiting. We eliminate this for the planter by cultivating and transplanting the roots until they are four years old, strong and healthy. Too good to be true, you say, and yet you have the word of one of America's most eminent horticultural authorities.

Plant some of these extra large roots this season. They have been transplanted and worked over the past four years purposely to give you immediate results.

To prepare an asparagus bed, prepare a place of fine loamy soil, to which has been added a liberal dressing of rich manure. Set in rows 18 to 20 inches apart in the rows. Make a small mound of the soil, over which the roots should be spread. Then cover the plants with about three inches of soil, mulch well with thoroughly rotted stable manure.

We offer these extra fine 4-year transplanted roots at \$1.00 per dozen, \$3.50 per fifty, \$7.00 per hundred

Order some and when received if not the largest, finest plants you have ever seen, return to us and we will refund your money.

Bleak House, Kinzer, Penna., May 13, 1921

Please send your 1921 catalogue to Mrs. Marshall Barton, Kennett Pike, Wilmington, Del. and mention that same was sent by request of Mrs. J. A. Nauman. We have been so pleased with our orders from your nurseries that it is with great pleasure, we recommend you to our friends.

E. H. Nauman. (Mrs. J. A. Nauman)

“Glenwood” Expert Landscape Service

This special service saves you time, money and disappointment. After years of close personal contact with our customers, we come more and more to feel that this is our opportunity to help you. Primarily we are nurserymen, and are interested in the distribution of trees and plants of all kinds, but for the convenience and assistance of our customers, we maintain this service department, and if you have just built a new house, or are planning the rearrangement of your grounds or an effective grouping on any part of your grounds you should get in touch with us, for at the head of our landscape department, is one of the foremost landscape architects of this country.

The Preparation of Landscape Plans for Large or Small Grounds

The drawing of a comprehensive landscape plan requires the thought, constructive skill, talent and valuable time of a designer, and the need of this art necessitates the employment of experienced, thoroughly competent men, who have not only knowledge of design, but of plant material and its artistic arrangement.

To procure results, we employ designers who have this knowledge, and while it is not our intention to derive any profit from their actual time and services, naturally we cannot give this service gratis.

To our customers who intend to improve their grounds, we will make sketches for nominal fees from \$7.50 and up, according to the problem and the time that it takes to elaborate the plan. We will refund this fee at the rate of 10% on orders.
